

PV Particle Vac

PV Particle Vac

Perfect for cleanroom applications, the Particle Vac (PV) is a moderate to heavy use dust collection system. Designed with a filter bag for easy and clean disposal of debris. The high sealed suction design allows for unmatched, consistent power while remaining extremely quiet. The ideal solution for capturing all types of debris except abrasive materials.

Features & Benefits:

- No motor brushes
- High speed turbine technology producing aggressive suction
- 88 SCFM on high speed
- 55dB on high setting
- Filter bag filtration 99.99% @ 1 micron
- Variable speed control
- Inlet: 1 1/2" at the vacuum
- Hose: 2 1/2" x 6ft expandable white hose
- 15 amp unit @ 115v max power
- Additional filtration options available

Dimensions & Weight:

- 14" W x 10 1/2" D x 14 3/8" H
- 35 lbs
